

September 25, 2015

Dear members and supporters of developmental activities,

In response to our invitation to support Adwa Hospital, we have received a medical equipment donation- a Microscope and a Centrifuge laboratory machine.

On behalf of Adwa General Hospital, Ethiopia and the people at large we would like to extend our sincere gratitude to the donor for the thoughtful and generous donation. We look forward to seeing the positive and uplifting progress in our wonderful community .

This generous donation will help our people getting quality health care services they deserve.

We are still accepting equipment donations so that we will send all with the oxygen concentrators soon.
