

Help Adwa Hospital

Sunday, May 10, 2015

Everything we are doing is based on the Hospital's need, we were communicating with the Hospital administration since the beginning of the projects(laundry and Xray). On May 2, 2015, we had a great meeting(teleconference) with members from Mekele, Addisababa, Adwa hospital, USA, and Canada. Based on the reasons mentioned on the letter sent from the Hospital(ቁጥር 5057/108 :28/07 /07), there will be a change on the current xray project(please read their letter for detail). Therefore, we are respecting their requests and priority so that there will be no duplication of work and equipment and unnecessary expense. According to their letter, 1-Suction machine(20) 2. Atmospheric Oxygen concentrator(30) 3. Pulsoximeter(3). are the first three in the list that they are looking for. These need to be Hospital standard equipment ,functional with Ethiopian Electric system, warranty, and must have spare parts,.
